

Name _____

Graph the function.

1) $f(x) = 3^x$

3) $f(x) = 4^x$

2) $f(x) = 2^x$

4) $f(x) = 5^x$

$$5) f(x) = \left(\frac{1}{5}\right)^x$$

$$7) f(x) = \left(\frac{1}{3}\right)^x$$

$$6) f(x) = \left(\frac{1}{2}\right)^x$$

$$8) f(x) = \left(\frac{1}{4}\right)^x$$

$$9) f(x) = 2^{-x}$$

10) $f(x) = 5^{-x}$

13) $f(x) = 3(x - 4)$

11) $f(x) = 3^{-x}$

14) $f(x) = 3(x - 2)$

12) $f(x) = 5(x - 1)$

15) $f(x) = \left(\frac{1}{2}\right)^x + 4$

$$16) f(x) = \left(\frac{1}{5}\right)^x + 4$$

$$19) f(x) = 3^{(x-3)} + 3$$

$$17) f(x) = \left(\frac{1}{5}\right)^x + 3$$

$$20) f(x) = 4^{(x+4)} + 1$$

$$18) f(x) = 5^{(x-3)} - 3$$

$$21) f(x) = 4^{-x}$$

Use the graph to find the requested value.

22) Find $f(1)$.

23) Find $f(0)$.

24) Find $f(1)$.

25) Find $f(0)$.

26) Find $f(1)$.

27) Find $f(-1)$.

28) Find $f(-3)$.

31) Find x where $f(x) = -4$.

29) Find $f(-1)$.

32) Find x where $f(x) = -2$.

30) Find x where $f(x) = -4$.

33) Find x where $f(x) = 4$.

34) Find x where $f(x) = 2$.

37) Find $f(-2)$.

35) Find x when $f(x) = -2$.

38) Find x when $f(x) = -4$.

36) Find x when $f(x) = -4$.

39) Find $f(-1)$.

Solve the problem.

- 40) Four bacteria are placed in a petri dish. The population will double every day. How many bacteria are in the dish seven days after the four bacteria are placed in the dish?
- 41) Three bacteria are placed in a petri dish. The population will triple every day. How many bacteria are in the dish five days after the three bacteria are placed in the dish?
- 42) Four bacteria are placed in a petri dish. The population will triple every day. How many bacteria are in the dish eight days after the four bacteria are placed in the dish?
- 43) Four bacteria are placed in a petri dish. The population will triple every day. How many bacteria are in the dish five days after the four bacteria are placed in the dish?
- 44) Austin invested \$12,000 in an account at 8% compounded annually. Find the amount in Austin's account after a period of 7 years.
- 45) Austin invested \$12,000 in an account at 8% compounded annually. Find the amount in Austin's account after a period of 9 years.
- 46) Austin invested \$12,000 in an account at 11% compounded annually. Find the amount in Austin's account after a period of 6 years.
- 47) Austin invested \$12,000 in an account at 8% compounded annually. Find the amount in Austin's account after a period of 8 years.
- 48) A particular new car is worth \$19,537. With each passing year, the value of the car will be 0.81 times its value the previous year. To the nearest dollar, what will the car be worth in 3 years?
- 49) A particular new car is worth \$19,617. With each passing year, the value of the car will be 0.85 times its value the previous year. To the nearest dollar, what will the car be worth in 3 years?
- 50) A particular new car is worth \$19,551. With each passing year, the value of the car will be 0.81 times its value the previous year. To the nearest dollar, what will the car be worth in 3 years?
- 51) A particular new car is worth \$19,700. With each passing year, the value of the car will be 0.83 times its value the previous year. To the nearest dollar, what will the car be worth in 3 years?
- 52) Four bacteria are placed in a petri dish. The population will double every day. How many bacteria are in the dish eight days after the four bacteria are placed in the dish?

Answer Key

Testname: WORKSHEET 8.1B_GRAPHINGEXPONENTIALFUNCTIONS_V01

1)
