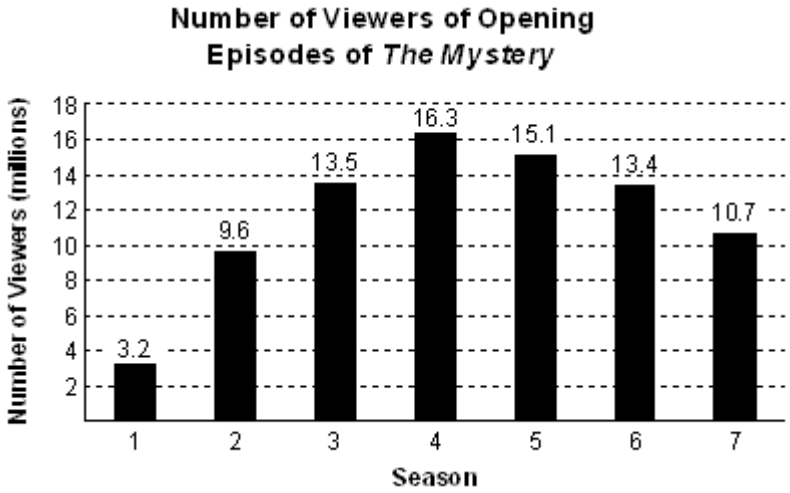
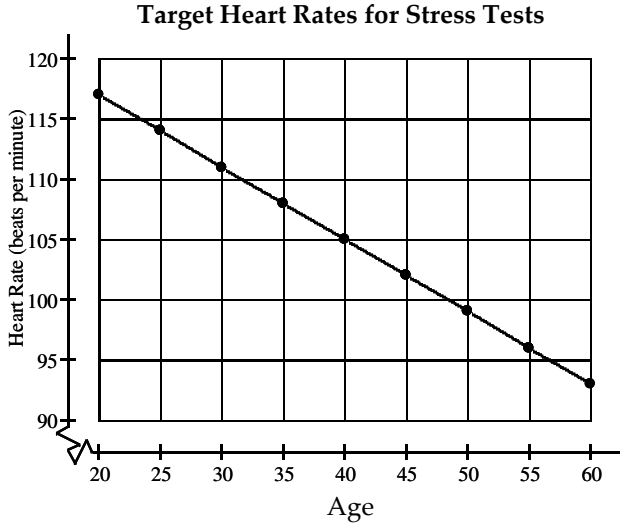
27) The Mystery TV show demonstrated just how complex and involving TV storytelling could be. The bar graph shows the number of viewers in the series opening episodes. 27) _____



The number of viewers of the opening episodes of The Mystery, V, in millions, can be described by the

mathematical model $V = -n^2 + 9n - 5$, where n is the season number. Use the formula to find the number of viewers of the opening episode of season 1. Does the mathematical model underestimate or overestimate the actual number of viewers shown by the bar graph? By how many million?

28) The line graph shows the target heart rate, in beats per minute, of people of various ages when performing an exercise stress test. 28) _____



Use the line graph to estimate the target heart rate for a 45–year–old taking the test.

29) The formula $H = \frac{3}{5}(215 - a)$ gives the target heart rate, H, in beats per minute, on a stress test for a person of age a. Use this formula to find the target heart rate for a 50–year–old. 29) _____
